

GYPSY HEARTBREAKERS

TECHNICAL RIDER

A) STAGE: The stage should be a sturdy, single level platform, at least **15' D x 20' W x 2' H** or at least or bigger than **16' D x 16' W x 2' H PLUS sound wings**. Overhead cover required for performances during daylight.

A carpeted drum riser (**8' x 6' x 2'**) is required at center stage.

Clear access to the load-in areas is requested, preferably at least three (3) hours before the time patrons arrive. Delays in starting performance due to failure to provide clear access are purchaser's sole responsibility.

Storage for equipment cases is required, preferably near the stage and out of sight of the audience. If stage is outside in direct sun, purchaser shall provide tented cover for musical equipment. If stage is outside in a damp area, plastic covers for equipment are requested. In short, outdoor stages and front-of-house positions should be covered and protected against the elements.

B) POWER REQUIREMENTS:

GYPSY HEARTBREAKER'S set-up requirements are at least two (2) individual and separate 20 AMP circuits @ 120V AC each, within 25' of center stage, for **GYPSY HEARTBREAKER'S** exclusive use. Power failure, delays in performance, and/or damage to equipment or personnel due to faulty electricity is purchaser's sole responsibility.

C) LIGHTS:

Two (2) lighting trusses (a front and a back) are preferred. At least one is required, with at least 8 multi-colored PAR 38/56/64 floods per truss. Suggested colors include: red, pink, violet, turquoise, yellow, and blue. Dimmer board or controller should be positioned at the FOH mix position.
